

## THE GÖINGE ROUTE (BLUE COLOUR)

The whole route is about 25 km in total. If you choose to cycle the alternative route to Vinslöv, then you will add about 25 km, making the total 50 km.

Heavy traffic may occur when you cross road 23 and road 21. Pay attention when crossing these roads. There are steep slopes up to Nävlinge Ridge and Göinge Ridge. Other than that, the route is pleasant and runs through low-traffic roads, both gravel and paved.

### Directions starting from Hässleholm Culture Facility:

Follow Järnvägsgatan northbound and turn onto Tingshusgatan, follow it straight past Stadshuset (brown brick building) to your left. Then turn left and then right onto Röingegatan, where there is a cycle path. Continue on Röingegatan past Qpoolen (swimming pool facility) and the cemetery on the right side, continue straight ahead to the roundabout, through the residential area. Continue until you see bicycle signs towards Attarp / Röinge School (just before reaching road 23). Then follow Skyttegatan, follow the signs for the road to Attarp / Röinge School. The trip continues through Troedstorp and just after entering Attarp there is a T-junction (about 2 km from Troedstorp).

Here, you can choose an alternative route to Vinslöv (\*see below). If you want to continue the regular route, turn right towards Ignaberga. The road runs via a bridge with a small bicycle road over highway 21. Follow the signs towards Tykarps cave to the left. Pay attention to traffic at this junction. Follow the road to Ignaberga new church (about 500 m), where you turn right past the red brick house. Follow the road to the new sign, Tykarpsgrottan, continue on this road that bends a little to the right. After 800 metres Tykarps cave will appear on the left-hand-side.

Continue on the road past Tykarps cave and turn left at a stone house. Follow the road until you reach highway 23. Turn left onto the highway 23 and then turn right to Påbro. Be careful when you cross this highly trafficked road.

The journey continues towards Finja Lake and Tormestorp village. The first T-crossing you see is where you turn left onto Fläckebacksvägen down to the next major intersection. Here you turn right onto Norra Byvägen and cycle down the hill. When the residential district begins to end, turn left onto Nilla Pihlblads road (at bus stop). Follow this road through the railway tunnel and further onto the roundabout. Turn left in the roundabout to make a detour to Hovdala Castle, or make a right to get back to Hässleholm. Cycle on the cycle path past Finjasjön until the next roundabout at Sjöröd, where you cycle on the left side towards Sjöröd. Continue into Sjöröd and take the first road on the right, up a long hill, and then follow the bicycle road towards Hässleholm. You will now pass through Hässleholmsgården and Hesslegårdens Golfbana. Follow the signs to the centre.

### \* Alternative route through Vinslöv, about 25 km from Troedstorp to Tykarpsgrottan
